

## Impact

### Students Succeed with an Entrepreneurial Mindset

NFTE engages students in school.

**81%**

of students felt that their NFTE teacher makes learning enjoyable and fun.

**79%**

of NFTE students liked the way they learned in their class.

**80%**

of NFTE alumni are in college or have graduated college.

In the United States:

- 65% of students nationally report being bored in class every single day. <sup>(a)</sup>
- 82% of these bored students indicate that their class material is not interesting. <sup>(a)</sup>

NFTE education is highly relevant.

**64%**

of NFTE students felt that their NFTE class was more relevant than their other courses.

**66%**

of NFTE students felt that their NFTE class taught them practical skills, compared to their other classes.

In the United States:

- 41% of bored students said that their class material was not relevant. <sup>(a)</sup>

## NFTE alumni are ready for the workplace.

# 86%

of NFTE alumni are either employed or furthering their education.

# 89%

of alumni respondents thought NFTE contributed to their knowledge, skills, and/or personal development.

# 58%

of alumni respondents frequently use what they learned through NFTE in their current jobs.

In the United States:

- Only 15% of low-income high-school students complete a career-ready curriculum. <sup>(b)</sup>

## NFTE alumni start businesses.

# 1 in 4

NFTE alumni have started at least one business post-NFTE.

# 16%

of NFTE alumni were self-employed or had a business open in the past year.

In the United States:

- 2% of youth aged 16–24 were self-employed in 2015. <sup>(c)</sup>
