

Our Purpose

NFTE activates the entrepreneurial mindset and builds startup skills in youth from under-resourced communities, to ensure their success and create a more vibrant society.

The Impact of an Entrepreneurial Mindset

- 86% of NFTE alumni are either employed or furthering their education.
- 80% of NFTE alumni are in college or have graduated college.
- 1 in 4 NFTE alumni have started at least one business post-NFTE.
- NFTE alumni earn 50% more than their peers.

NFTE Entrepreneurship Pathway and Certification

In an innovation economy, there are **no traditional paths to success**. To activate the entrepreneurial mindset in young people, NFTE’s Pathway begins by **igniting the imagination**, before taking students through the journey of creating and refining an original business concept. NFTE’s Entrepreneurial Teacher Corps, along with volunteer entrepreneurs and business leaders, prepares **students to take the stage** in a business plan competition series; and ultimately NFTE students have the opportunity earn the **Entrepreneurship and Small Business (ESB) Certification** from Certiport, a Pearson VUE business.
