

How We Do It

NFTE programs are based on experiential, project-based learning that integrates digital tools and lean startup methodologies and uses a unique learning cycle to enhance the student experience. Students are engaged through authentic learning as they develop their own business ideas. They're motivated by NFTE's signature business plan and pitch competitions, and they begin to build professional networks as they work with volunteer business plan coaches. NFTE students are building their entrepreneurial mindset while building business and academic skills. The result is career readiness and success in the 21st century workplace.

LEAN STARTUP PRACTICES

UNIQUE LEARNING CYCLE

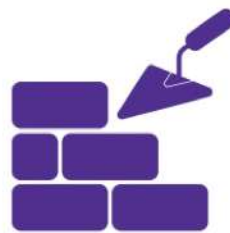

Entrepreneurial Investigation

Concrete experiential activities infused with mindset skills. **Students are left with questions...**

Entrepreneurial Foundations

Students get some answers to their questions through engaging abstract content focused activities.

Entrepreneurial Lab

Incubator time for students to apply foundational knowledge to their evolving NFTE business idea.
